When I try installing that same java fix I get the following Error: Java for OS X can't be installed on this disk.. For more information on the transition of products from the legacy Sun download system to the Oracle Technology Network, visit the SDLC Decommission page announcement.. I didn't want to install the legacy Java 6 or manually mess with configuration files so this was the best solution, even though I don't intend to develop in Java either.. If you already have a support contract see support note 1389674 2 For more details, please visit the Oracle Java SE Advanced page.. A newer version of this package is already installed Con esto arregle al software scilab-6.

Only developers and Enterprise administrators should download these releases Downloading these releases requires an oracle.
